

WG 9 – Climate Change

New actions to be explored soon.

ICOMOS is pleased to announce this year's theme for the International Day on Monuments and Sites (IDMS) :

HERITAGE CHANGES

The IDMS - 18 April 2023 provides a timely opportunity to showcase strategies demonstrating the full potential of heritage research and practices which deliver **climate-resilient pathways**, while advocating for **inclusive transitions to low-carbon futures**.

ICOMOS members and all those who wish to celebrate the Day may refer to the following questions and are encouraged to address some of the SDGs (4, 5, 7, 9-15) as part of their holistic thinking.

// How can cultural heritage conservation

drive climate action?

// How do local and traditional knowledge systems contribute to developing viable climate adaptation measures?

// How can local and traditional knowledge systems mitigate future climate change risks and impacts?

...
